

Challenge the concepts with the reality

Description

SSE for SDGs map

Tool to help you find structures near you, and how they respond to UN's SDGs.

24h for change

Teams have 24h to propose innovative solutions to specific problems. At the end of the 24h, they will make a presentation in front of a jury. It will require a bit of work from you, but will be very valuable for your group.

Divide your group in teams, each of them receives 2 SDGs and has to find a project idea that combines them : to what problematic does this project respond? What form? Each team will have to prepare a final pitch presentation in front of the others and a jury.

Sustainable initiatives tour

This one will require the most work for you as you will organise a tour or meetings with your local companies and nonprofits to show your group what type of initiatives can concretely take place and that sustainable change is happening everywhere.
